

MMWEC Internship 2026 Treasury Intern

Program Overview

The Treasury Internship provides hands-on exposure to public finance, treasury operations, and financial management within a public power organization. The intern will support day-to-day Treasury functions while developing foundational skills in cash management, investments, reconciliations, and professional financial operations. The program emphasizes experiential learning, structured weekly focus areas, and a practical capstone project aligned with Treasury needs.

Learning Objectives

By the end of the internship, the intern will:

- Understand Treasury's role in supporting MMWEC's financial health and energy mission
- Gain exposure to cash management, investments, and internal controls
- Develop professional documentation, analytical, and communication skills

Scope of Work

Treasury Operations Support

- Assist with organizing and reviewing financial and investment data
- Support basic cash tracking and documentation

Investment & Financial Exposure

- Learn how investment activity is recorded and monitored
- Assist with tracking maturities, interest, and basic performance data

Professional Development & Collaboration

- Attend selected Treasury and cross-functional meetings
- Prepare professional meeting minutes

Capstone Project

The intern will complete a final project that applies learned concepts to a real Treasury need. Example projects include:

- Investment maturity or tracking tools
- Reconciliation support or process documentation
- Internal reference or training materials

Value to MMWEC

This internship provides meaningful operational support during peak summer workload while developing future talent with exposure to public finance, utilities, and energy-sector financial management. The structured scope ensures clear deliverables, professional development, and alignment with MMWEC's broader internship framework.
